**DETAILED ACTION**

***Election/Restrictions***

1. Claims 1-17 have been elected with traverse via telephone conversation with Examiner Pasterchyck.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. R is indefinite. What does "relatively low steric hindrance" mean? Is "the X substituent" the same as R or is there no antecedent basis.

5. R' is indefinite. What is a "bulky substituent with respect to Y?" Isn't Y an atom? The parenthetical language,

Art Unit: 1713

"(both heteroalkyl and heteroaryl)" should be deleted because it undermines the scope of "heterocyclic."

6. T is defined in claim 1 as two or more bridging atoms.

However, T is a carbon atom in claim 2.

7. In Claim 4, X and Y are define as a part of T, not a separate entity please clarify.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

9. Claims 1-3, 6-8 and 13-14 rejected under 35 U.S.C. 102(a) as being anticipated by McLain et al., U.S. Patent No. 6,258,908 (hereinafter "McLain"). See McLain, col. 16, Fig XVI.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eilerts, U.S.

Art Unit: 1713

Patent No. 6,399,725 (hereinafter "Eilerts"). The Examiner considers the precursors to be non-heterocyclic with respect to X and Y and R and R' are non-identical and unequal in steric size.

11. Claims 5, 9-12 and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
